

Name:

**Al Diggles, Flexco Field Engineer**

On Being a Valuable Partner:

**"I had an idea for a custom solution, so I talked to our engineers. Together, we developed a cleaner that met the customer's needs."**

Al Diggles, Flexco; Harrison Rhodes, Capcorp

**Mineline® MSP Precleaner**

This solid-blade belt cleaner removes tough material without damaging belts or fasteners.

**Al uses his industry experience to solve customer problems and improve belt conveyor productivity.**

If there's one thing Al Diggles understands, it's conveyor systems — he's worked on them for 27 years. So when a Texas power plant needed a cleaner for its oversized belts, Al already knew there was nothing big enough on the market. He worked with his team at Flexco to develop a custom solution.

To ensure the new product was installed properly, Al worked closely with partner and distributor Harrison Rhodes of Capcorp, a subsidiary of Purvis Industries.

At Flexco, Al's story isn't unique. That's because our employees don't just sell products, they solve problems — and that makes us the partners you want on the job. To partner with Flexco, call **1-800-541-8028** or visit our website today.
